

Beech Class Update Friday 18th November

We had a wonderful day of spots and stripes creating artwork using a range of circles and lines. Mrs. O' Sullivan led an art teaching session for us in the morning. Beech Class had great fun working with Willow Class. We will show you the finished pieces once we've got them altogether! Here's a snippet of the morning.

We have had such an incredible week with math's learning this week. The children have all worked so very hard. This ranged from number bonds to 10, 20 and 100! We used 10 frames and numicon to support learning. All children will really benefit from practising these at home. I have designed the home-learning task around this. Knowing number bonds to 10 fluently will really support their next piece of learning. Please, please practise lots at home!

In history we learned about why Hadrian's Wall was built. We got in role as Emperor Hadrian, Roman Soldiers and 'The Picts.' Do ask them about this at home! Perhaps, they could do some research at home about Hadrian's Wall and share with the class next week.

Have a great weekend!

Ms. Keogh 😊
