

## Beech Class Weekly Update

Friday 26<sup>th</sup> January

*Science:* Up to now, we have learned about mammals and reptiles in great detail. This week, we focused on amphibians. You could discuss this at home to see what they can recall or take it a step further and carry out some more research at home.

*History:* This week we learned about Rosalind Franklin and DNA.

At the beginning of the session we had an interesting discussion prompted by the following question:

Would it be fair if only the boys in Beech Class got to observe the Strawberry DNA experiment.

## Math's in Beech Class:

Year 1 math focus this week:

Subtraction (by taking away/crossing out)

Year 1 math focus for next week:

Subtraction on a numberline

Year 2 math focus this week:

Subtracting 1 digit numbers from 2 digit numbers (using a number line to count back).

Year 2 math focus for next week:

Adding and subtracting 10s. You could use this 100 square at home to find 10 more or 10 less than a number. Why not test each other for fun?!

Both year groups have also had sessions focused on 2D and 3D shape.

Thank you for your continued support,

Mrs. Oliveira.
