

Beech Class Weekly Update

Friday 2nd February 2024

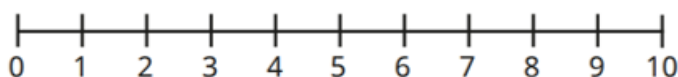

Year 1 maths:

Year 1 used number lines to solve subtraction problems. We spent an extra day on this. I would encourage you to practise counting back from 10 at home as often as you can as this will really support them with this concept. Next week, we will be solving problems with addition and subtraction.

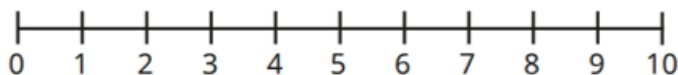

LI: I can subtract using a number line.

$$8 - 3 =$$

$$7 - 2 =$$

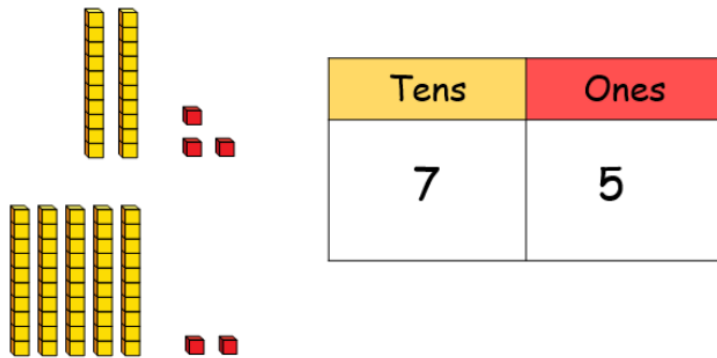

$$6 - 4 =$$

Year 2 maths:

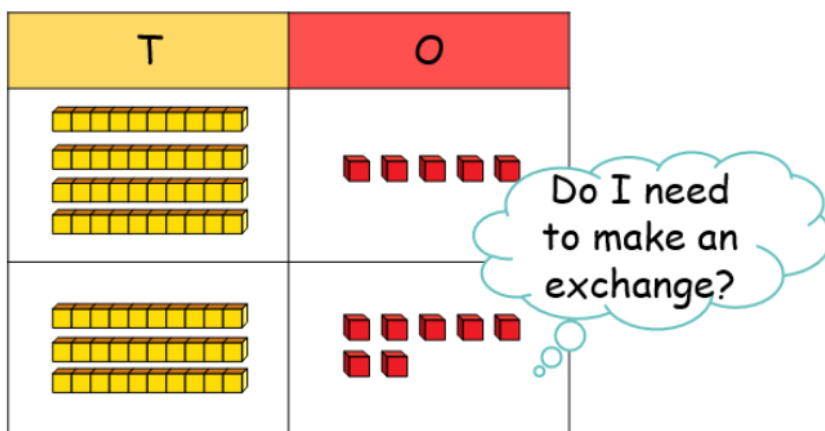

Year 2 have been adding and subtracting 10s with numbers up to 100. Yesterday they were adding two 2 digit numbers. We spent more time on this today remembering to add the ones first. I would strongly encourage to practise this at home.

Use base 10 to calculate $23 + 52$

Next week, we will be adding two 2 digit numbers and crossing 10.

Use base 10 to calculate $45 + 37$

This week, we had a visit from Olympian athlete Frederick Afrifa. It was an incredible experience. The children loved joining in with the activities. He shared a wonderful message with us:

Believe in
Greatness

We have been very busy this week, writing letters to the Earth. I am more than proud of everyone in Beech for their perseverance with this Big Write.

Thank you for your continued support,
Mrs. Oliveira
