

## Beech Home-learning Task Friday 15<sup>th</sup> March

What a wonderful week it's been in Beech Class. It was **assessment week as well as science week** so our timetable looked a bit different. This means that there are **no new words this week**. Instead, I would like you to revise the words from last week in preparation for our test next Friday.

As the focus of science week has been time, we challenge you to **work on telling the time at home**. We always find that learning how to tell the time is best done little and often and this is something we can all work on together.

The first goal is to tell the time to the hour.

The second goal is to tell the time to the half hour.

If your child can already do this, carry on with quarter to and quarter past. I have also set a time 'to do' on Purple Mash. There are lots of time resources on there that you can access if you'd like to!
