Beech Class Update 9th October 2026

Our Weekly Update

Art Week: Science Meets Art!

As part of Art Week, we combined our learning in science and art! We explored the beautiful world of deciduous trees, carefully observing the trees around us and collecting a variety of leaves. We then used our observations and collections to inspire our own creative artwork.

We are so proud of the beautiful display we created together, showcasing both our scientific observations and our artistic talents. What a wonderful way to bring our learning to life!

We hope you'll get to see it next week during reading week. 😊

Today, we went on a very exciting trip to Oxford Brookes University for a special art experience!

Earlier this week, we were invited to bring in a special item from home. On Monday, we wrote about our chosen items and shared why they are so meaningful to us. During our trip today, we took photographs of our special items to inspire our own artwork. We can't wait

to share our finished creations with you in our half-termly newsletter, so you'll have to wait until then to see what we've been creating!

In the meantime, here are some lovely photos of us holding our special items.

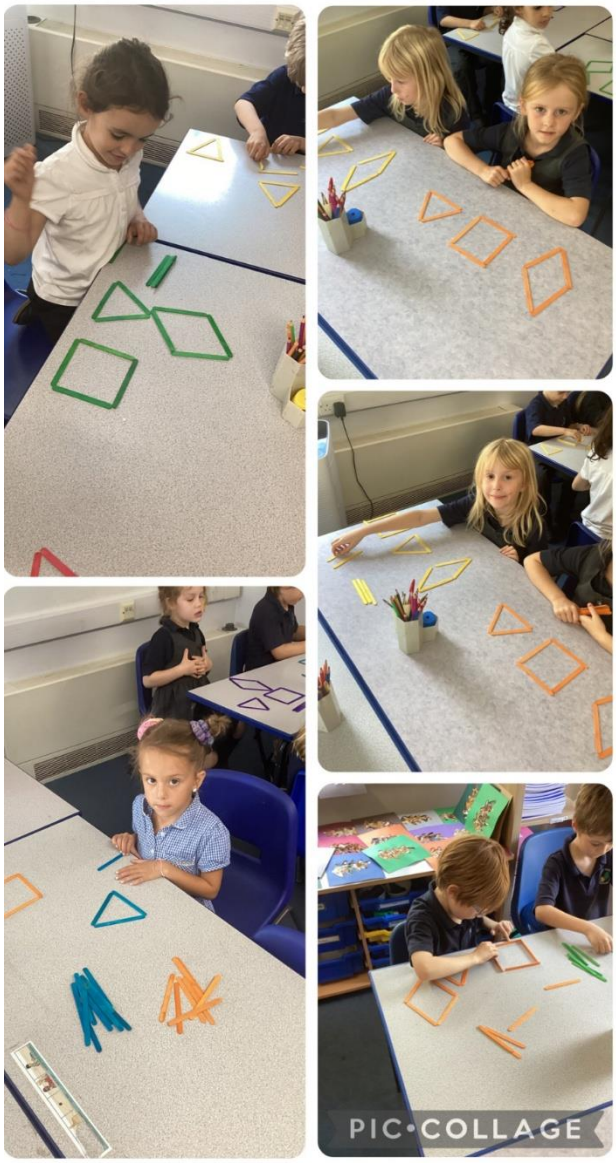
Maths: Exploring 2D Shapes

In maths, we continued learning about shape, focusing on the properties of 2D shapes.

It would be super helpful if you could spend a little time talking about 2D shapes at home. Can your child name different shapes and describe their properties? In particular, encourage them to count the **sides and vertices (corners)** of shapes they spot around the house.



Thank you for your continued support! 😊
