Beech Class Update Friday 18th September 2026

PE: Gymnastics

This week in PE, we have been developing our gymnastics skills using a range of apparatus. The children have been fantastic at exploring different ways to move, balance, jump and travel safely. It has been wonderful to see their confidence grow as they challenged themselves and tried new movements. We are so proud of the enthusiasm and determination they have shown!

...yet

In History this week, we have been learning that different structures are built for different reasons. We explored some fascinating structures from around the world, including the Great Wall of China, Hadrian's Wall, El Castillo and the Colosseum. The children enjoyed finding out why each structure was built and what it was used for. We then put our learning into practice by working together to build our very own Hadrian's Wall! The children showed fantastic teamwork, creativity and enthusiasm.
