

Beech Class Weekly Update

Friday 6th February

Art: We began our pathway of print making. This is the first step in creating rainforest flowers. More on this to come!

While we had some printing going on, we also had some sketching. The children sketched pictures of rainforest flowers and some crafted their own mini sketch books.

Science: Food Chains

We learned about food chains this week. Someone in our class noticed that they had some creatures from one of the food chains on his water bottle!

Maths: For our 15 minute fluency sessions each day this week we have been focusing on doubling numbers. Here some of the children are using their fingers to represent non doubles!

PE: We had the best weather for our PE lesson this week. We spent some time preparing for the GB Athlete event today!

Writing: We used our senses this week to describe woodlands and forests. We also learned about different forms of sentences. Ask your child about commands and exclamation sentences.

Thank you for your continued support.

I really appreciate it.

Mrs. Oliveira
